November 2025

agilityeco.co.uk

As leading providers in the energy efficiency sector, we deliver a wide range of professional services designed to reduce carbon emissions, lower energy bills and improve comfort in homes and businesses nationwide.

Our experienced team supports homeowners, landlords, businesses and local authorities with everything from insulation and ventilation, to retrofit assessments and project management.

We work with public and private sector clients to deliver large scale portfolio projects, creating healthier homes, increasing energy efficiency, reducing energy bills and alleviating damp and mould risks.

Our Priorities

Our priorities are to deliver **long term improvements** with a focus on **health, wellbeing and environmental benefits**, **support local economies** and develop a **local skills base**.

upgrade

28,000

homes in 2026

We plan to continue increasing our impact in this sector, scaling our operations to **upgrade 28,000 homes in 2026**. Building on our previous successes, we aim to provide affordable warmth and bring communities closer to a net zero future.

Our Services

We are dedicated to **improving the energy efficiency of homes across Britain**

How we support your projects

We can **unlock a range of funding** for the Council and your residents. Between April 2024 and March 2025 we unlocked **over £130 million** for our clients.

- ✓ Streamline the bidding process by working with you to submit a robust, coordinated proposition
- ✓ Develop an output-led, resident-focused plan to support your submission
- ✓ Support your team through dedicated project management and bid writing
- ✓ Demonstrate the added local economic, social and environmental value of your submission

We unlocked over
£130m
for our clients

Funding schemes we deliver

Warm Homes: Local Grant

We **specialise** in
delivering WH:LG:

- ✓ Full end-to-end service
- ✓ Targeted Marketing and Resident Engagement
- ✓ Project design and transparent delivery
- ✓ Fully compliant installs using in-house and approved installers
- ✓ Clear detailed reporting
- ✓ Resident centric approach including free energy advice and other support

Recent Projects

In partnership with Portsmouth City Council and its consortia, **we successfully delivered Home Upgrade Grant 2 (HUG 2)** across **32 local authorities**

✓ **1,162 homes** received **2,217 improvements**

✓ Responsible for **17%** of GB properties **upgraded** under the **HUG2 scheme**

“ AgilityEco have supported us to deliver several grant-funded domestic retrofit schemes over many years. Their experience, contacts and well-established installer network have been invaluable in the success we've had delivering these schemes.”

James Hill
Director of Housing,
Neighbourhoods and Buildings

Portsmouth Council

Current Warm Homes Local Grant partners include:

Connected For Warmth (CFW)

CFW is delivered in partnership with Affordable Warmth Solutions, Connected For Warmth (now in its 4th phase) shows how we can take a holistic approach to project design, by supporting a combination of energy efficiency funding routes.

- ✓ **Loft & cavity wall insulation:** Delivered under ECO to **9000 homes**
- ✓ **Air Source Heat Pumps (ASHPs) and energy bill support:** Currently delivering under ECO with a target of **500 homes**
- ✓ **Boiler Upgrade Scheme (BUS):** Where residents may not meet eligibility, we can deliver 20% of targets via this scheme
- ✓ Over **£25.4 million funding** delivered

The **Warmer Homes programme** offers a range of **fully funded energy measures** to help households **stay warm and reduce energy bills**.

Long-time Test Valley residents Mr and Mrs Smith shared their experience of upgrading from an ageing oil boiler to a modern, renewable heating system powered by solar energy.

Mr & Mrs Smith

from Test Valley, Hampshire

Discovering Warmer Homes

Mr and Mrs Smith had lived with the same oil boiler for 35 years. It was becoming increasingly costly to run and service, and its inefficiency was affecting their day-to-day comfort.

“ Some winters we even ran out of oil by accident and were left with a cold house until more arrived. Friends of ours had recently had energy efficiency measures fitted, so when we heard about Warmer Homes, we decided to look into it. ”

National delivery network

Using a blend of inhouse delivery and **locally approved subcontractors**, we install a range of improvements including Loft Insulation, Cavity Wall Insulation, Solid Wall Insulation, Solar PV and Air Source Heat Pumps (ASHP).

Quality assurance and compliance

We're committed to delivering right-first-time installations through rigorous application of health and safety practices.

MCS

Adding value in your communities

How we invest in **local communities** at every stage of our delivery model:

- ✓ Create locally-based supply chains and offer local employment opportunities
- ✓ Employ locally-based workforce
- ✓ Provide training and apprenticeships to help reduce the skills shortage
- ✓ Collaborate and support local charitable organisations
- ✓ Support local environmental and community improvement projects

This includes access to the **Local Energy Advice Partnership (LEAP)**, a **free energy and money saving service** that helps people keep warm and reduce their energy bills without costing them any money.

Procurement

We are an approved provider on several public sector frameworks and purchasing systems, offering simple and transparent routes to procurement.

Partner with us

Let's work together to keep making genuine impact and helping the people most in need. To discuss your local ambitions and commitments, get in touch.
